Speaker Bios:

Sammy S. Noumbissi
DDS, MS

Sammy Noumbissi obtained his Doctorate in Dental Surgery from Howard University College of Dentistry. After obtaining his DDS, he received formal training in Implant Dentistry from the three-year Graduate program in Dental Implantology at Loma Linda University. There he earned a certificate in Dental Implantology and a Master's of Science degree in Implant Surgery. For the past 12 years he has limited his private practice to dental implantology. He is currently an associate professor of implant dentistry at Wichita State University postgraduate AEGD program. Dr. Noumbissi is a member of the editorial board of the Journal of Implant and Advanced Clinical Dentistry, a reviewer for the Journal of Oral Implantology and the founding president of the International Academy of Ceramic implantology.

He is active in clinical research and in areas that further the science of implant dentistry. Dr. Noumbissi applied area of research is focused in the fields of hard and soft tissue regeneration, osseointegration and the oral soft and hard tissue responses to bio ceramics. He has published abstracts and articles in peer reviewed dental journals namely the Journal of Dental Research, the Journal of Oral Implantology and the Journal of Implant and Clinical Dentistry.

Dr. Noumbissi is founder of Miles of Smiles Institute for Dental Implantology; he lectures extensively and trains dentists nationally and internationally on topics relating to ceramic dental implants and metal free dental implantology.

Sakiliba Mines, MD

Dr. Sakiliba M. Mines, MD is an Integrative Family Physician. She has been a pioneer in Integrative Medicine, practicing for over 30 years. She obtained her Bachelor of Science in Biochemistry -Nutrition at Spellman College in Atlanta, Georgia, and her Medical Doctorate from Hahnemann Medical College in Philadelphia, Pennsylvania. She completed her specialty as a Family Physician at Howard University Hospital and most recently, has attained her Doctorate of Integrative Medicine from Capital University of Integrative Medicine in Washington, D.C. She is a member and instructor with the International Association of Colon Hydrotherapist, and a member of the American Holistic Medical Association.

Dr. Mines is the medical director and founder of The Institute of Multidimensional Medicine and Medical Spa. She has gathered a team of professionals to address the mind, body, spirit and energetics through integrative and comprehensive care. Dr. Mines utilizes extensive medical diagnostic testing, quantum physics assessments, genetic testing and detoxification to find the root cause of the medical problem and to arrive at an individualized program leading to lasting results.

Dr. Mines is a researcher who presents the newest information to her patients. Dr. Mines teaches at seminars and lectures to educate the community.

How Multidimensional Medicine Improves Soft and Hard Tissue Integration of Dental Implants

DATE: February 21 and 22, 2013
LOCATION: 801 Wayne Ave, Suite G200
Silver Spring, MD 20910
SPEAKERS: Sakiliba Mines, MD and Sammy Noumbissi, DDS, MS

How Multidimensional Medicine

Improve Soft and Hard Tissue Integration of Dental Implants

Multidimensional Medicine and Metal-free Dental Implantology

Catapult Group, LLC designates this activity for 12 Lecture continuing education credits.
Patients are capable of restoring themselves pretty effectively after implant surgery, so most of the time with some help from modern medical interventions like antibiotics and fluids more often than not implants integrate and patients heal uneventfully. Today however there are an increasing number of people who are choosing healthier lifestyles, alternative medicine and are more and more reluctant to accept drugs and have metals implanted in their bodies. They increasingly resist the idea of drugs to treat or prevent health problems. An often overlooked reason for delayed healing is patient toxicity. Toxins accumulate in deep tissues and bones therefore detoxification should be an integral part of pre and post implant surgery. An optimally functional immune system is an important factor in avoiding complications and failures of dental implants during the early stages of healing and bone integration.

This two-day program will demonstrate how without drugs dentists can prepare and manage their implant patients to optimal healing and successful implant integration. This program will present a series of natural multidimensional modalities and protocols that when combined with the placement of ceramic implants allow for metal-free and non-toxic teeth replacement.

The goal of this course is to enable the participants to understand and appreciate the critical interrelationship that exists between a clean body, a boosted immune system and optimal recovery from implant surgery. As such during consultation the doctor will be taught how to obtain relevant information from the patient and determine what type of pre and post surgical detoxification and immune boosting protocols to request from the multidimensional physician.

This course will enable participants to:
- Obtain proper medical History
- Order the right pre and post surgery protocols.
- Understand the rationale behind the use of Zirconia as a dental implant material.
- Recognize indications for successful placement and integration of zirconia dental implants.
- Proper and predictable selection of temporization techniques for one-piece zirconia implants.
- Appropriate selection of permanent restorative materials.

**COURSE OBJECTIVES:**

This is a two-day course, 12 CE (continued education) credits will be awarded and full tuition for both days is $599. International Academy of Ceramic Implantology Members (IAOCI) save 100.00. If you are not yet a member of the IAOCI you can sign up for a one year membership ($395.00) at www.IAOCI.com/join. All IAOCI memberships will be verified before you are enrolled in the course. Annual memberships are $395.

**CANCELLATIONS AND CHANGES:**

No refunds or cancellations will be accepted after February 15, 2013. We cannot assume responsibility for losses due to participant travel arrangements.

**REGISTRATION:**

This course has limited space and only eight (8) doctors will be able to attend this session.

**PAYMENT METHOD:**

- Check
- MasterCard
- Visa

**COURSE OVERVIEW:**

For further information please call Ronetta Jones at 301-588-0768 to register.
