

Airway-centered Mouth Doctor (AMD)[™] Training Seminars: Airway Diagnosis and Redevelopment for General Dentists

April 26-27, May 31-June 1, June 28-29, 2019
Falls Church, Virginia, 10 miles from Washington DC

Bending over the patient drilling and filling is a tough way to make a decent living. Hi, I am Dr. Felix Liao, a fellow general dentist and the author of [6-Foot Tiger 3-Foot Cage](#) and [Early Sirens](#). I am inviting you to become an Airway-centered Mouth Doctor (AMD[™]). This training can significantly enhance your career, health, and yes, your life.

As an AMD[™], you will enjoy better clinical outcome, higher net income, unimaginable job satisfaction, better sleep, less aches & pains, and more energy — see the end of p.2.

AMD[™] Seminars Course Outline

A. Growing New “CSI” Eyes to connect mouth-mind-body: [April 26-27, 2019](#)

1. Chair Side Investigation: intake interview, physical evaluation, initial assessment
2. Airway Diagnostic Records: CBCT, sleep test, clinical photos, model analysis
3. Case Presentation and ADR “homework” with Sassouni Plus cephalometrics

B. 3D Jaw Diagnostics™: May 31 & June 1, 2019

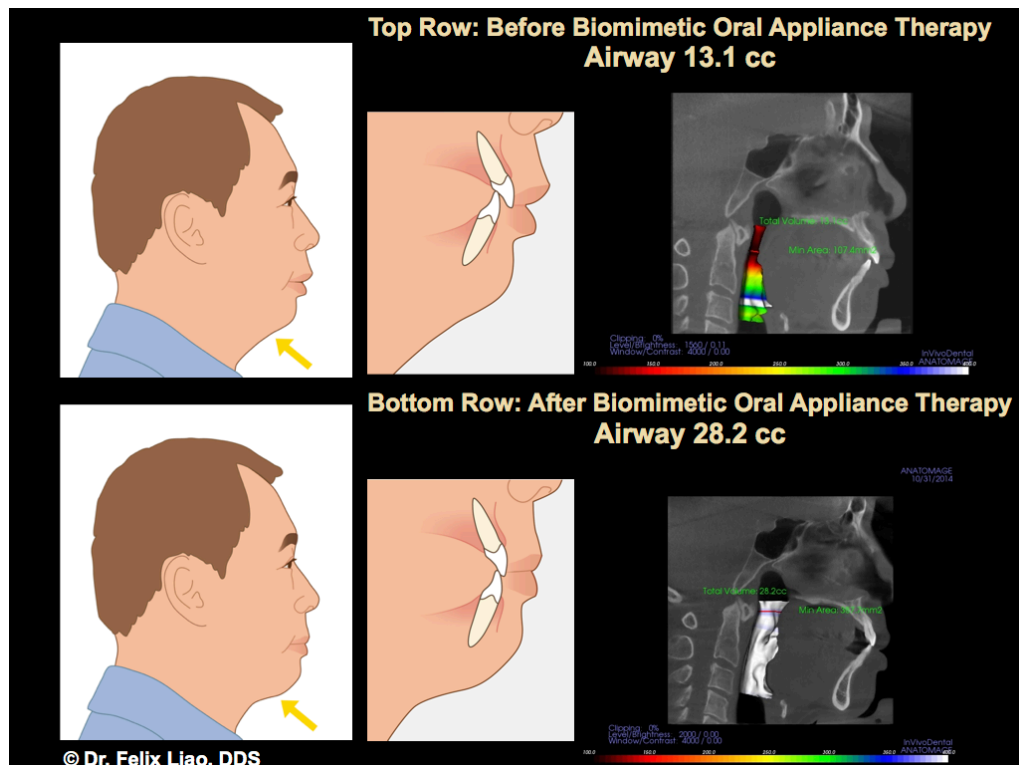

1. Diagnose maxilla and mandible deficiency/excess relative to cranium
2. Design DNA appliances: matching components with 3D Jaw Diagnostics
3. WholeHealth Diagnosis and recommendations as needed

C. Appliance Delivery and Adjustments: June 28-29, 2019

1. Delivery checklist and patient instructions
2. Monitoring visits: appliance checks and adjustment, patient evaluation, who and when to collaborate with WholeHealth professionals

How is AMD Training different from other airway residencies & sleep appliance seminars? An AMD is far more than a dentist with many oral sleep appliances. AMD Training benefits include:

- **Mentoring:** invaluable guidance for your first 2 cases to get over the early humps.
- **3D Jaw Diagnostics™:** learn how to diagnose cases and design airway appliances
- **WholeHealth:** build knowledge base to maximize systemic health and wellness to complement oral appliances.
- **Personal Health Upgrade:** 93% of dentists in AMD training and 100% of their staff suffer from undiagnosed airway obstruction — see my own case below.

Airway-Certified Mouth Doctor™ (AMD) Seminars Registration
2019 Group A — April 26-27; May 31-June 1; June 29-30

Doctor name: _____ Office phone: _____

Personal (direct) email: _____ Cell phone: _____
